Dr Glasspoole

This is a 1930 Table Station also Met Mag. No monthly postcards have been received since November 1930 We had trouble in completing this return last year See encls 22A and 26A.

We have sent the usual application Suggest letter be sent now

3/3/32

We can use this I think even if we have to estimate

Substitute Cranmere Pool if we learn definitely that Druid has stopped

Form 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Leusdon Lodge Ashburton
in the County of Devon
by Colonel L. F. Wales Stanley

Lat. Long.
Time of Observation 9·30
Nearest Railway Station Ashburton 5½
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground ft. 4 in.
" " " " Sea Level 800 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Leusdon Lodge 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

A comparison of your return for 1925 with neighbouring stations suggests that an omission has occurred on December 28 as shown below.

	December 27 INS	28 INS	·29 INS
Ashburton Hele House	·29	·95	1·89
Leusdon Lodge	·40	—	·90
Huccaby House	·26	·65	·94

If you have no reason to the contrary we would recommend that a value of ·75 inch be adopted making the total for the month 8·41 inches and the year 62·37 inches

We should be glad of your comments on this point.

J Glasspoole
17-7-26

REPLY.

I notice in my book in which I pencil up the days readings that on the 28th Dec. ·90 was inserted & then erased. And the ·90 was alotted to the 29th. The readings at Hele House & Huccaby House are very little guide to this house. As this is situated on a particularly dry patch of the moor. And when we have no rain here one can often see the storms following the course of the river which would embrace Huccaby House & Hele House. But I am quite prepared to adopt your suggestion, especially as I was in bed with flue about that time.

S. R. C. Hamley Col
19-7-26

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 7.

1. The amendments indicated in red ink are adopted..........
2. Necessary corrections made in Monthly Return..........
3. " " " " Weekly (Form 3110)..........

AIR MINISTRY.

FORM 1090. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1926.

Kept at LEUSDON LODGE nr Ashburton
in the County of DEVON
by Col. S. R. A. Hankey, D.S.O.

Lat. Long.
Time of Observation 9·30
Nearest Railway Station Ashburton 6 miles
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground – ft. 8 in.
" " " " Sea Level 800 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following. —

Records taken in Millimetres should be entered on Form 1091.

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1921.

Kept at Dolbear. Ashburton

in the County of Devon

by Mr. W. W. Battiscombe

Lat. 50° 32 N Long. 3° 45 W

Time of Observation 9.15 a.m. G.M.T.

Nearest Railway Station Ashburton G.W.R.

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. in.

" " " " Sea Level 300. ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following. nil

Records taken in Millimetres should not be entered on this form.

(Signed) A. Mitchell [P.T.O.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

Lea Combe House Axminster 1925,

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
The entry on your 1925 rainfall return for August 11th appears high compared with neighbouring stations, as shown below Coaxden Hall ·04 Lea Combe House ·70 Yarty House Axminster ·06 If you have no reason to the contrary we would recommend that a value of ·07 inch be adopted, making the total for the month 2.67 and the year 44.77 inches. The number of rain days suggests that the gauge is not visited every day. We should be glad if you could arrange for this to be done in future. We should be glad of your comments on the suggested amendment. H. E. Carter 28.6.26	With reference to your query. I find following from my diary of Aug 11th: "Very heavy squall at 12·30 lasting about 10 minutes gave ½ inch of rain. The squall was most sudden, & entirely local, with hail & rain. No rain recorded within a mile of the here". On Aug 12th I find "Fresh SW wind. Rain set in 6 a m & continued with only 2 hours break till evening. An extraordinary day for August". No doubt the extra ·20 was collected between 6 a m & 10 a m when the gauge was emptied. I am however surprised that Coaxden & Yarty only report ·04 & ·06. The rain of the 11th was purely local. Dr Woodhouse who was in Axminster ~~[illegible]~~ during the storm told me they had none at Coaxden. The rain of 12th however, was quite different; being a general SW cyclonic rain. It is possible these 2 observers have taken the ~~[illegible]~~ data 24 hours later. I see no rain was recorded here on 13th. The storm of 11th was peculiar, as normally that type of storm misses this station. My gauge is visited daily at 9 am winter & 10 a m summer time.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 7.

Accept ·70 inch for Aug. 11th.

1. The amendments indicated in red ink are adopted Hob.
2. Necessary corrections made in Monthly Return
3. " " " " Weekly (Form 3110) 1.7.26

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division

FORM 1090

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1924.

Kept at Rosamondford
Aylesbeare
in the County of Devon
by A. T. Loram Esq J.P.

Lat. 50' 43" Long. 3' 23'
Time of Observation 9 a.m.
Nearest Railway Station Broadclyst
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground - ft. 6 in.
" " " " Sea Level 220 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.
·17

Records taken in Millimetres should be entered on Form 1091.

AIR MINISTRY.

Form 1090

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Barnstaple (N. Devon Athenaeum

in the County of Devon

by Edith Young.

Lat. 57. 5 Long. 4. 4

Time of Observation 10 a.m.

Nearest Railway Station Southern Rly.

Diameter of Funnel of Rain Gauge 8 in.

Height of top of Gauge above Ground 1 ft. in.

" " " " Sea Level 25 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to The Superintendent, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to The Superintendent, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

FORM A. 1. **METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.**

REGISTER OF RAINFALL IN 1927.

Kept at Barnstaple

in the County of Devonshire

by Miss E. Young

Lat. 51° 5' N Long. 4° 4' W.

Time of Observation 10 a.m.

Nearest Railway Station Barnstaple

Diameter of Funnel of Rain Gauge 8 in.

Height of top of Gauge above Ground 1 ft. — in.

" " " Sea Level 25 ft.

M.O. 11 JAN 1928

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

FORM 1090.

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Roborough Reservoir

in the County of Devon

by Frank Howarth

Lat. Long.

Time of Observation 9 A.M.

Nearest Railway Station

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 0 in.

" " " " Sea Level 548· ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

FORM A. 1. METEOROL ANIZATION.

RE

Kept at Webbery
in the County of Devon
by Wm. H. M. Boyd

Lat. Long.
Time of Observation 9·30
Nearest Railway Station Bideford
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 10 in.
„ „ „ „ Sea Level 355 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

FORM 1090 Emp Ww

1750

JAN 1924

A

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Gammaton Reservoir

in the County of Devon

by Caretaker

Lat. Long.

Time of Observation 9. A.M.

Nearest Railway Station Bideford

Diameter of Funnel of Rain Gauge 5 ins.

Height of top of Gauge above Ground ft. 9 ins.

" " " " Sea Level 306.00 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

see below

Records taken in Millimetres should be entered on Form 1091.

FORM 1090 **METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.**
(*formerly B.R.O. Form A.1*).

REGISTER OF RAINFALL IN 1922.

Kept at Jennett's Reservoir Bideford
in the County of Devon
by D. J. Bell
A. L. Fost C.E.

Lat 51°-0'-0" N Long 4°-13'-2" W.
Time of Observation 9 a.m.
Nearest Railway Station Bideford
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 0 in.
" " " " Sea Level 67·38 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

REGISTER OF RAINFALL IN 1921

Kept at Bradninch
in the County of Devon
by Miss H. Hepburn

Lat. 50° 49' 28" Long. 3° 25' 35"
Time of Observation 9 a.m
Nearest Railway Station Hele & Bradninch
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. in.
" " " " Sea Level 300 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

FORM 1090.

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at Dunmore Bradninch

in the County of Devon

by Miss H. Hepburn

Lat. 50° 49' 28" Long. 3° 25' 35"

Time of Observation 9 a.m

Nearest Railway Station Hele & Bradninch G.W.R

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. in.

" " " " Sea Level 300 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

FORM 1090

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1925.

Kept at Braunton

in the County of Devon

by Arthur John Besly

Lat. 51.10N Long. 4.10W

Time of Observation 9.0 AM

Nearest Railway Station Braunton

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 0 in.

" " " " Sea Level 145 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

AIR MINISTRY.

FORM 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1925.

Kept at COMBE BANK BRIXHAM.
in the County of DEVON
by H. CLAYTON

Lat. 50°23′32″ N. Long. 3°31′22″ W.
Time of Observation 9 AM.
Nearest Railway Station BRIXHAM.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 6 ft. 6 in.
" " " " Sea Level 115 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

M.O. 7
4 JAN 1926
Jan 1926

Dear Sir.

Please find enclosed form filled up for Rain Fall for the year 1925.
The rain measured on Dec 30th was so heavy at times that I think it really under registered as it was jumping out of the gauge.

Yours faithfully.
Harold Paylor

The amount x for looks reasonable
17.6.26

P.T.O

Will you please send me
½ dozen more forms. No 1090
as I often get asked for
particulars of rain.

A.C.

Send with compts.

/Done . 5/2.

Section **A** for the entry of Daily Observations.

FORM 1090 METEOROLOGICAL OFFICE. BRITISH RAINFALL ORGANIZATION.
(formerly B.R.O. Form A.1).

REGISTER OF RAINFALL IN 1921.

Kept at Buckland Brewer
in the County of North Devon
by Miss Beatrice G. Rogers

Lat. 51. N. Long. 4. W.
Time of Observation 10.30 a.m.
Nearest Railway Station Bideford.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground ft. 10½ in.
" " " " Sea Level 469. ft.

1922

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

AIR MINISTRY.

Form 1090

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Buckland Brewer

in the County of North Devon

by Miss Beatrice G. Rogers.

Lat. 51. N. Long. 4.

Time of Observation Irregular.

Nearest Railway Station Bideford.

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground ft. 10½ in.

" " " " Sea Level 469 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to The Superintendent, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to The Superintendent, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

QUERY FORM.

On examination of the return of observations made at Buckland Brewer 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
The entry on your 1925 rainfall return for November 1st is low compared with neighbouring stations as shown below	Nov. 1st 1925. I was not at home on that date - & in view of other places, this may have been wrongly entered - ·05. for ·50. making total 4·72.
Landcross ·54 inch Orleigh Court ·46 " Buckland Brewer ·05 " Parkham ·50 "	January - 1925. The total - 3·43. is correct according to my book. The error may be in copy of daily entry.
If you have no reason to the contrary we would recommend that a value of ·50 inch be adopted making the total for the month 4·72	February - 1925. Correct total 7·86.
The totals for January, February and May are not in agreement with the sums of the daily values. The correct totals appear to be 3·39, 7·86 and 4·75 inches respectively.	May - 1925. Correct total 4·75. The two last are errors in my addition.
After the above amendments have been made the total for the year is 47·50 ins.	This makes total for year 47·54.
We shall be glad of your comments on these differences. H. L. Carter	Apologies for mistakes which I have only just come home to correct. - Beatrice G. Rogers.

29.6.26.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 7. 2.8.26.

1. The amendments indicated in red ink are adopted......................
2. Necessary corrections made in Monthly Return......................
3. " " " " Weekly (Form 3110)......................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....

FORM 1090.

REGISTER OF RAINFALL IN 1930.

Kept at Budleigh Salterton

in the County of Devon

Diameter of Funnel of Gauge 5 in.

Height of top of Gauge above Ground 1 ft — in.

,, Ground ,, Sea Level about 150 ft.

~~Please note – I don't know if this is kept in accordance with your plans – but the rainfall inserted on the 1st a month really fell on the last day of previous month – i.e. part of ·26 on June 1 ought to be included in total for May & deducted from June?~~ J.H.

THE MORNING MEASUREMENT IS CREDITED TO THE PREVIOUS DAY.

An observer who does not conform to this rule should insert the reading made on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following. ·00

Form A. 1. **METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.**

REGISTER OF RAINFALL IN 1921.

JAN 1922

Kept at Bumleigh Bere Alston
in the County of Devon
by Sir Alfred Croft K.C.I.E

Lat. 50′ 29 28″ Long. 4′ 12′ 34″
Time of Observation 9 a.m.
Nearest Railway Station Bere Alston
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 6 in.
" " " " Sea Level 125 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to The Superintendent, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

AIR MINISTRY.

FORM 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1924.

Kept at Kingford, Burrington

in the County of Devon

by J. S. C. Davis

Lat. 50° 57′ Long. 3° 58′ (approx.)

Time of Observation 9 a.m.

Nearest Railway Station Portsmouth Arms

Diameter of Funnel of Rain Gauge 5 in. 1925

Height of top of Gauge above Ground 1 ft. in.

Approx. " " " Sea Level 135 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

....

hat answers to the

measured rainfall ?

fall ?

1677

This record appears low.

It was several inches lower than anything in this River Taw last year & is again this year.

Do you know anything about this station ?

The record is certainly low & I don't think it should be published though it is no worse than 1924. It seems to be carefully kept & I suspect leak in gauge. H.L.

Mr. Carless says pass it & put on inspection lists H.L.

FORM A. BRITISH RAINFALL

REGISTER OF RAINFALL IN 1921

Kept at Thornworthy. Chagford

in the County of Devon

by H. B. Varwell

Lat. Long.

Time of Observation 9 a.m

Nearest Railway Station Moreton Hampstead

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 0 in.

" " " " Sea Level 1150 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE DIRECTOR, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

South Kensington, London, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Thornworthy, Chagford 1925, the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

A comparison of your rainfall return for 1925 with neighbouring stations shows that on certain dates your entries are not in good agreement with the places named below

	Stinhall.	Chagford. Thornworthy.	Chagford. Kurish.	Adopt.
Jan. 25.	1·71	·65	1.15	1·65 in
Mar. 21-31.	·46	—	·46	·50 "
April 4.	·82	·16 ✓	·60	·61 "
" 12.	—	·33 ✓	·04	·03 "
Oct. 25	·23	·88	·25	·38 "
" 30.	·39	—	·34	·40 "
Nov. 4.	·53	—	·58	·50 "

It is suggested that the values set out in the last column should be adopted. If you concur in these amendments the totals will be Jan. 9·85, Mar. ·99 April 4·02, Oct. 5·435, Nov. 5.05 and for the year 57·06" inches.

We shall be glad of your comments on these points. H. E. Carter

18.6.26.

REPLY.

I believe my returns are correct. This place is 1150 feet above the sea between 2 hills — I do not know where Stenhale is but we expect to get more rain than places to the E.

I was ill part of 1925 & away from home, but my man who was here is a reliable man

I have checked my entries

Adopt observers figures with query in each case.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted.................. 23.6.26.
2. Necessary corrections made in Monthly Return..................
3. " " " " Weekly (Form 3110)..................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

South Kensington, London, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

Kuish, Chagford 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
A comparison of your rainfall return for 1925 with neighbouring stations suggests that the entry on 19th December is unduly low as shown below. Stinhall 1.05 in. Chagford (Kuish) ·04 " do. (Thornworthy) ·75 " Mortonhampstead ·77 It is recommended that the value 1.04 in. be adopted. If you concur in this, the total for December will become 8.32 in, and for the year 53.62 inches. We shall be glad of your comments on this point. H. Carter 18.6.26	I concur. Probably the entry was a clerical error since heavy rain fell next day. R H Dyke.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted........................
2. Necessary corrections made in Monthly Return........................
3. " " " " Weekly (Form 3110)........................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division........................
